MEMORANDUM

TO: K. Michael Thompson, Reclamation Hydrologist
James V. Smith, Reclamation Soils Specialist
Utah Division of Oil, Gas and Mining

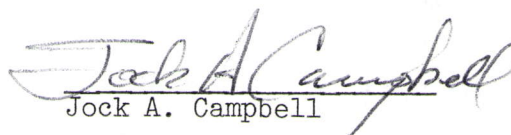

FROM: Jock A. Campbell, Chief Petroleum Geologist

SUBJECT: U.G.M.S. Publications

I have just happened to see your recent Environmental Assessment for proposed activities by the Ziegler Chemical and Mineral Corporation, in eastern Uintah County. I am impressed that it is a well done, professional effort. However, I would like to point out that we have publications which are more recent and more accurate than some of those used in compilation of your figure 2.2-7. I enclose a copy of U.G.M.S. Map 33, which, though general, is far more accurate than that published in the R.M.A.G. atlas. We also publish, in cooperation with your agency, an oil and gas fields and pipelines map (no. 41), the most recent edition of which is dated 1976. The 1978 edition is presently being drafted. There are also numerous publications on other aspects of the geology of the state.

In addition to our own geologic work, we publish the Bibliographies of Utah Geology as U.G.M.S. Bulletins 40 and 103. In order to provide an information source as up to date as possible, annual bibliographies for 1971 through 1976 are available by request through our Information Department. I hope you will find this information useful to your investigations, and we will be happy to assist you in any way we can.

Jock A. Campbell
